

"Coronavirus - Origins and Antidotes"

The White Winged Collective Consciousness of Nine through Magenta Pixie

You ask us where this, that you call 'coronavirus' originated. Whilst the origins at this point are of far lesser import than the antidotes, we move into explanation of such.

The creation of this mutated virus, which still undergoes mutation in it's chemical make up (so is therefore not 'one thing' but an evolving construct) the creation of this is multifaceted, as a convergence if you will, yet not in the sense of a destined convergence of timelines, more of a converged creation coming in predominantly from inverted matrix systems, dark or artificial technology if you will, as a convergence not as a 'Star of David' formation but as the spider's web if you will.

We provide here coded seed points for understanding and realisations which are an important part of the process of creating the antidote lifestyle.

A convergence is a convergence nevertheless and is a multiple reason or multiple origin formation.

However, we can break this down into three seed points for clarity.

The first two are black box programs in origin, yet intentions were not to create this virus mutation as the outcome that is within your current reality.

These black box programs had other intentions. The virus is a mutation from original intention as well as a mutation at the cellular level. It is both spiritually and biologically a mutation. It is important for you to know this, for mutations do not hold power over organic structures that harmonise with Source frequency. *We repeat, mutations do not hold power over*

organic structures that harmonise with Source frequency.

The first two seed points as black box programs were thus:-

This first one as separate intention was regarding what you may know as biological warfare. This, having been in creation for many years from seed point was NOT directed at humanity at large or people en-masse. We repeat - this was NOT directed at humanity at large or people en-masse. Believing this to be the case and that service-to-self factions have the power and ability to do such creates extreme dis-empowerment and activates the victim/saviour template within through fear.

This was an 'insurance policy' creation if you will, a weapon if you wish to so call it this, to be used within battlegrounds as in military use not civilian use. We present the most basic of templates for this black box program here, for the entire presentation of truthful and larger picture here is beyond the scope of this transmission. We present here only the most relevant information giving you keycoded light as information and seed point into antidote creation.

The second, as separate intention was of a totally different origin to the first. That of hybridisation experimentation of biological life forms such as gene splicing and cloning. This was utilising animal, sea life and somewhat plant DNA, this was not utilising human DNA in this particular black box program. Again, the intention here was not to target humanity at large or the people en-masse. The intention was God complex related and focused on geneticism and testing. Again, we present a most basic template of this much larger picture.

The third main seed point within the spider's web convergence that resulted in this mutation was of natural means. We say natural means as it was not a black box program per se. Yet it still held a disharmonious core.

This was to do with exploitation, lack of care, disregard and cruelty towards animal life forms.

These three seed points came together, over a period of time and series of events to create a distorted and mutated virus at the cellular level within a

certain faction within the captive animal kingdom. This then spread to the wild and free animal kingdom, through deliberate means, the virus then migrated into the human kingdom becoming a virulent strain as it once again mutated.

So the intention was not pure, it was black box, negative polarisation as an intention creation. Yet the intention was not to create that which you call 'coronavirus' which was, from the third dimensional perspective 'accidental' in it's final formation as coronavirus.

There were other attempts at 'coronavirus' from black box technology through different means at certain times, this is outside the scope of this transmission but this is not the first coronavirus if you will but the first created this way and is unique yet has been given a label that has been utilised before for a different kind of virus with different make up and different seed point creations.

One cannot however say it was of 'natural means' due to the black box program seed points. One equally cannot say this was deliberate and intentional in the form that it presents as the result, coronavirus, for that was not the original intention. The resulting mutated virus migrating into and infecting human population, has been hijacked. Therefore it is a black box program from the perspective of that hijacking and regarding two seed points within the convergence as creational seed point.

Therefore it is most understandable that there are many explorers of this situation who point the finger and say this was deliberate, for this conclusion holds partly truth but not complete truth.

It is also equally as understandable that there are many other explorers of this situation who say this was an accident and of natural origin, for this conclusion holds partly truth but not complete truth.

When one moves into heated debate, discussion and infighting with ones allies on this subject, one creates yet a new hijacked black box construct and adds to the overall negatively polarised intention of division within humanity. Indeed humanity at large is targeted when it comes to the

creation of division within, however it is the individuals themselves who allow themselves to be hijacked this way when they take a polarity stance. *We repeat, humanity at large is targeted when it comes to the creation of division within however it is the individuals themselves who allow themselves to be hijacked this way when they take a polarity stance.*

It is therefore most important as antidote to this mutation and lifestyle as antidote creation, to hold balance and a disposition that is pragmatic, objective, alert, aware, open, accepting, logical, intuitive, 'non judgemental within the higher thought processes' into 'making judgements in integrity within third dimensional reality.'

Now we have presented to you a basic origin of said mutation into what you now know as coronavirus, we present seed points into antidote and antidote as lifestyle.

As we have said, this mutated virus has been hijacked. One aspect of this hijacking is creation of panic, fear and chaos in order to prevent carbon to crystalline transformation within humanity, cosmic memory recall and thus ascension.

Humanity at large has been targeted for this. However, it is of the utmost import for you to be fully aware of and know that the hijacking can target the carbon aspect only. The crystalline aspect cannot be hijacked and your knowing of this IS your antidote. *We repeat for as we have said this is of the utmost import for you to know at the deepest levels of your being. The crystalline aspect cannot be hijacked and your knowing of this IS your antidote.*

When one is aware of this, the crystalline code shields and shelters the carbon aspect making you immune. This transmission is specific to that immunity.

Yet one must be pragmatic. One cannot sit back and believe they are immune from hijacking without taking action upon the third dimensional level to ground that belief and thus create immunity.

Another aspect of this hijacking is the control of humanity through the

'problem, reaction, solution' pathway of chemical antidote as vaccine. This is a major black box program and is a false antidote. *We repeat, this vaccine is a false antidote.*

This false antidote contains DNA scrambling codices within prevention of carbon to crystalline transformation and thus positively polarised ascension as it's core intention.

If fear and panic through adrenal over productions and burn outs within humanity does not hold back enough light awakenings then the black box program false antidote vaccine will - or so is the perspective held by a broken negative faction who can only recycle old programs and cannot create new negatively polarised programs.

The reason for this is because critical mass for the ascension timeline has been reached by humanity. The dark worker elite cabal factions hope to reduce critical mass back to controllable levels and switch timelines with Armageddon core templates. The explanation of this is beyond the scope of this transmission but we shall speak further on this in future transmissions. Know that critical mass is currently within a light cascade or overflow and the ever increasing minority of fifth dimensionally aware starseeds hold the space continuously for this light cascade or overflow, keeping critical mass at the level of ascension timeline manifestation and the paradise core templates.

With keycoded transmissions such as this one we deliver and other similarly coded presentations, the starseeds holding this space are continuously energised with crystalline and gemstone light in order for them to contain the fifth dimensional reality system and the fourth dimension. For those with this reality creation as their focused intentional spiral core timeline, the critical mass cannot be lowered and the Armageddon core template timeline achieved.

All black box programs are thus backfiring and mutating themselves from dark intention into light as manifestation.

However, there are those brothers and sisters that are 'caught within the

dark net' so to speak and we give to you here, within this transmission, through our conduit Magenta Pixie, seed point and keycoded frequency for true and absolute antidote.

Yet we cannot give you the antidote in it's entirety for it is a lifestyle, a mindset and a spiritual path. We can but guide you, as you too can guide others. The work as it were, must be undertaken by you, the spiritual warrior.

We speak now to those known as starseeds who can build their own shields and give healing and building tools to others, for many shall come with their fears and worries. You as masters, as healers of Gaia, are thus, yet again, much needed.

Indeed you knew this to be so for this is your mission and this is your calling.

Dedication to the path creates a reality dedicated to you, your life force and your life and existence on all levels. Dedication to the path of light creates a reality where you exist as light, radiate light and you ARE light.

We have presented an antidote to that which we speak of within our previous transmission 'The Black Box Programme and the Rose Gold Flame as Antidote'.

This information holds alignment for this coronavirus as you so call it. The reason is this :-

the mutated virus holds it's most virulent strain at 'first bite' if you will and indeed that first bite was literal.

Yet as the virus migrates into the human kingdom, the immunity to it begins through mechanisms you know as 'hundredth monkey effect' if you will or we could refer to this as biological telepathy or indeed magick. Yet pragmatically and physically this is, in it's simplest and most accurate presentation, energetic communication at the collective level. Indeed, you are one, you are unified. You therefore create the antidote together, at the collective level, as one. You shield those that are unable to add their

consciousness to this antidote.

We have said many times 'the light is catching' and we mean this, in this particular instance, as energetic communication. Where immunity begins in one area of space and time so too does it simultaneously manifest in complete match in another area of space and time. This is your clue, your keycode and your teaching into creating true global immunity. The vaccine is the false immunity. Your collective power of light is the true immunity. Your knowing of this at the deepest intrinsic levels give you the immunity and thus you build your architectural, energetic shield.

So after a series of subsequent 'bites' - this time we speak in metaphor, the mutation loses it's virulence and potency. By the time the virus reaches humanity at large it is no longer any threat to the healthy individual with strong immune system in place.

We repeat, By the time the virus reaches humanity at large it is no longer any threat to the healthy individual with strong immune system in place.

This brings us to another aspect of the convergence we speak of and the antidote within the transmission 'Black Box Programme and the Rose Gold Flame as Antidote' which is that which you call 5G.

The electro-magnetic aspect of the human organism is scrambled or miscoded, if you will, creating an immune compromised human organism.

Through close proximity to original 5G testing areas, codices within the human DNA system respond to energetic bandwidths and wavelengths which are planetary and cosmic. The 5G created grid is a false bandwidth and wavelength.

This is the reason there are many explorers of this situation who say that the coronavirus as you call it, is in fact 5G poisoning. There is partly truth within this but it is not the whole truth.

So we are saying here that the human energetic is supposed to key in to and merge with planetary and energetic signalling from these bandwidths. Original 5G scrambles the DNA code and the human biofield connects to

the false energetic signalling.

This took place around the same time as the mutated virus migrated over to the human kingdom yet was a different and separate black box program that was subsequently hijacked and linked together.

As we have said this situation is a convergence, as in , a multitude of explanations and causes. The antidote, so too, is multi disciplinary and multi faceted.

As we have said this situation is a convergence, as in, a multitude of explanations and causes. The antidote, so too, is multi disciplinary and multi faceted.

This is original 5G only that causes this immune compromisation through electro-magnetic scrambling signal. Watered down 5G can contribute towards immune compromisation and signal scrambling in some susceptible individuals. Yet there are many who remain strong and immune.

We say again, this is a multi-levelled causation and the antidote is similarly multi-levelled.

Yet, immune compromisation is a concern amongst many of you, with or without 5G.

We draw your attention to our previous transmission 'Lessons from a Living Lemuria' which hold keycodes and information for the 'karma free' state of being which is a high immunity state. Within this transmission is the nutritional baseline for ascending humanity. Which is Keycoded information for high immunity.

We suggest to the serious lightwarrior regarding this situation that you call 'coronavirus' to engage in intense study of our words within this transmission we deliver now yet also the previous two transmissions we have mentioned. Keycodes and seed point inspirations for your own creations and healing work shall be discovered within.

For those who do not wish or feel called towards intensive study in this

area then the 'shortcut' or 'cheat sheet' if you will is as thus:-

Sigil work through triquetra symbolism or that which brings to you knowing of and the connection with the trinity, is one aspect.

Colour therapy working as 'gemstone light field' codes is that of higher heart chakra as pink or in actuality rose gold as a flame. Through the gemstone work one can utilise rose quartz, pale ruby or that which is known as morganite. However when utilising morganite, take the more aligned label of pink beryl or pink emerald, as morganite as a terminology is in and of itself a hijacked program through gemstone grid infiltration.

The gemstone grid infiltration is beyond the scope of this transmission however we shall speak more on this within future transmissions.

The next working is activation of the parasympathetic nervous system on a regular and consistent basis (daily for some of you) through your own personal unique workings. You can utilise out of body travel, meditation, yoga nidra or hypnosis, energetic psychologies, acupuncture or QHHT or similar work. Utilising a healer for assistance with this work will be in alignment for many of you, most especially the newly awakened starseed.

This work counteracts the adrenal systems that lead to potential immune compromisation or to balance immunity and empower immunity within those who have central nervous system dis-harmonies. This work also assists in achieving that which we call 'karma free state.'

The next working is the nutritional path with that which you call superfood or superherb as adjuncts to the baseline. One looks here to cleanse and detox whilst simultaneously building, strengthening and nourishing. There are many teachers working tirelessly 'round the clock' if you will to deliver to you this information in various guises and from different perspectives.

Your answers and antidotes are not to be found within these transmissions per-se. Yet keycodes and energetic seed points ARE to be found through that same telepathic channel that we call 'hundredth monkey effect'.

This transmission we deliver to you now adds to the planetary and global

antidote as true antidote. Therefore be aware of and be in understanding of what this transmission is and what it is not.

Further work is to be undertaken. We repeat, further work is to be undertaken.

However, to ground such planetary and global antidote, the incantation we present shall suffice, holding with it the light coded seed point into synchronicity and magick for that further work or discovery we speak of.

And thus you shall say :-

I am immune from accepting random, negative or infiltrated thought, seed or program from becoming suggestion, energetic or physical code.

I am immune from accepting infiltration beyond my own personal infinity sphere and I hold strong that boundary with the sovereignty of the Excalibur Codex.

I ask and call all lightbeings and angelic ascended master and Archangel structures of positive polarised source consciousness to stand by me in my endeavours as a light warrior of Gaia in transition.

I hold fast to the diamond light and rainbow gemstone codes and fields as an activated starseed of multidimensional awareness.

I make this my call, my plea, my bond and my forever code.

So shall it be and so it is.

Within this I stand with compassion, love and gratitude.

We are the White Winged Collective Consciousness of Nine
